ARIEL RIVERA

WEB DEVELOPER

Experienced working on a team that develops software according to provided design specifications. Manage time responsibly by prioritizing projects from highest to lowest impact. I work with or without supervision and enjoy solving problems by asking relevant questions to teammates.

EDUCATION

Polytechnic University of the Philippines
Diploma in
Information Communication Technology
June 2017 – September 2020

PROJECTS

CLICK2BUY PRIME
- Assigned on building the front-end of a prospected e-commerce website of the company.
- Build the front-end design based from design specification usingHTML5, CSS3, and JavaScript.
- Migrate to Laravel Framework after finishing the prototype. Change the routing into dynamic path according to its category.

TOOLS AND EQUIPMENT MONITORING SYSTEM
- During our capstone project, I was assigned as a developer to build a system that will monitor the tools and equipment from the college laboratory.
- I used what I learned during my internship, which is Laravel Framework. Used MySQL for the database and Bootstrap for the design.
- Saved waiting time of the students and administrative who manually borrow and monitor the assets from the laboratory.
